

NoteEz

Team Name - The Orion

NoteEz

An Application built to help students
choose from vast amount of notes and
help them save their time and increase
efficiency

Problem Statement

Many students often struggle with the challenge of identifying credible and high-quality study resources for their academic needs. In an era of abundant information and various sources available both online and offline, students frequently find themselves overwhelmed and confused about where to study from. This lack of guidance leads to inefficiency in learning, wasted time and effort, and potentially compromised academic performance.

NoteEz' , helps students select the best notes to study from. Students can also help other students by uploading their notes. Students using this application will be authenticated with VIT-Email to maintain integrity of the application

TECHNOLOGIES USED

1. FLUTTER , DART - TO CREATE CROSS PLATFORM MOBILE , WEB APPLICATION WHICH CAN RUN ON BOTH MOBILE AND THE WEB
2. DATABASES LIKE - GOOGLE FIREBASE
- 3 - TENSOR FLOW TO IMPLEMENT AI MODEL

WORKING

1. FRONT - END UI INTERFACE FOR THE APPLICATION WILL BE MADE USING FLUTTER AND HENCE CAN BE ACCESED VIA BOTH MOBILE AND WEB
2. GOOGLE FIRE BASE WILL BE USED TO MAINTAIN DATABSES AND HENCE IMPROVE THE SECURITY
3. AI MODEL MODEL USING LIBRARY LIKE TENSORFLOW WILL BE USED TO IMPLEMENT AI MODEL FOR OPTIMIZING SELECTION

Conclusion

Therefore , students can save their time using this application and hence improve their efficiency and productivity , by using the best materials available from the wide range of choices , rated by students themselves

Thanks
